

## Overview

PRINCE (PRoject IN Controlled Environments) is a project management methodology designed to ensure that a system development project meet its objectives, within constraints and delivers stated benefits.

This course is primarily aimed at staff in a junior team manager or project support and assurance role in a PRINCE2™ environment who require a formal qualification in the project management method.

## Objectives

To provide delegates with knowledge of PRINCE2 and to prepare them for the PRINCE2 Foundation Certificate examination.

## Skills Gained

At the end of the seminar, delegates will be able to:

- Understand the components and main processes of PRINCE2
- Apply the processes of Controlling a Stage and Managing Product Delivery.
- Prepare for and take the PRINCE2 Foundation Certificate examination.

## Pre-requisites

Delegates should have an understanding of how a project is managed, and experience of working in a project environment.

## Who Should Attend

Anyone who wishes to gain the Foundation Certificate in PRINCE2.

## Content

- Projects and Project Management
- Overview of PRINCE2
- The PRINCE2 Process model
- Organisation
- Management of risk
- Business Case
- Plans and Product-based Planning
- Controls
- Quality and the Quality Review Technique
